Verbiage for additional funding request for PulseNet Area Lab:

\$17,500: Funding is requested for an additional 2-user BioNumerics license that would allow for completion of several data mining projects (currently planned for the Northeast Region) without interfering with routine PFGE lab work.

Thanks,
lh

No problem - you will need to provide Ann with the description of what you want and whether it goes in PulseNet activities or PulseNet area activities.

Is it too late to add on \$17,000 for an additional bionumerics license for a 4th user? Sorry!! lh

One question – at the end of the pulsenet one there is a request for \$6500 for PulseNet upgrade software for three user licenses. Are you requesting that again?

Linda –

I am sending you the foodborne disease budget narrative for you to look over. I doubt that much will need to be changed since they were pretty clear last year what they were willing to fund. I also have the CDC budget mark-up copy but not electronically. I will have a hard copy for you at the meeting tomorrow afternoon. I know that they didn't fund STEC last year but maybe it is worth trying again, given the state of affairs.

I also hope that the progress report and the operational plan is coming along – tick tock... ☺
